DIVINNI CLINICS NETWORK

A Physician's Guide to Every Divinni Program

Why each program matters, what it means for your practice, and every medication your patients can access through the Divinni Clinics Network — free to join, always.

LegitScript Certified · Accredited 503A Pharmacy Network · Zero Membership Fee

BEFORE THE PROGRAMS

Why Physicians Join the Divinni Network

Divinni brings the patients, handles the marketing, and connects you to a certified pharmacy network — so your practice can offer more, without adding overhead.

Zero Membership Fee

No cost to join or stay in the Network, ever. Being listed and receiving patient introductions is free.

You Keep Your Visit Fee

You collect payment from the patient and keep your office-visit fee in full. Divinni never touches it.

Marketing Already Running

Divinni's in-house marketing company, C-Media 360, advertises every program across Google, Meta, YouTube, Pinterest and LinkedIn.

HOW PARTICIPATION WORKS

1. **Choose your programs.** Elect only what you're comfortable treating — a weight-loss physician can decline men's sexual health, a urologist can decline HRT or skin care.
2. **Get listed in the Network.** Patients searching by zip code or physician name find you for exactly the programs you chose.
3. **Patients book directly with you.** Interested patients go straight to your own scheduling system; Divinni never inserts itself into the appointment.
4. **See the patient, collect payment, done.** The patient pays for the visit and medication together. You keep your visit fee; medication comes from Divinni's accredited, LegitScript-certified pharmacy network.

WHY CHOOSE DIVINNI

What makes the Divinni Clinics Network different from other compounding pharmacies and online sales platforms:

1 — Lower prices than the competition
Our medication prices are lower than competing platforms, making treatment more affordable for your patients.

2 — We hold your hand
We educate and walk your team through how easy it is to order compounded medications on the Divinni network. Some compounded medications act better than branded products because of their combined ingredients, and they are not available on your clinic's current EMR formulary.

3 — Ongoing advertising campaigns
Online campaigns run continuously to promote every participating network provider.

4 — More patients for your clinic
We generate online leads and send those patients to clinics within their zip codes, growing your revenue.

5 — Organized by disease state
Every program is arranged around the specific condition we treat, so it is easy to understand and tackle each one.

6 — Lower clinic attrition
Offer in your clinic the same services patients have recently been leaving for online telehealth.

7 — Two new revenue sources
Earn from medication sales, plus the fee for the additional office visit and any CPT code you deem appropriate for each patient.

8 — Always on top of the market
We negotiate with many federally registered 503A pharmacies to keep bringing the best prices and highest revenue to clinics.

9 — Collective buying power
Our combined volume lets us obtain products below market pricing.

10 — Certified, vetted pharmacies
Every pharmacy in our network is licensed and LegitScript certified, so your patients receive quality you can stand behind.

METABOLIC CARE

Diabetes & Weight Loss

This is the single highest-demand program in cash-pay telehealth today. Patients are actively searching for GLP-1 access at prices below what insurance-gated pharmacies quote, and Divinni's marketing sends that demand straight into your schedule — giving your practice a steady stream of metabolic-care visits without you having to build a weight-loss program from scratch.

Highest Search Volume	Keep 100% of Visit Fee	Zero Cost to Join
of any category Divinni advertises	medication is billed separately	no membership or listing fee

Foundayo (Orforglipron Tablet)

Oral GLP-1 (orforglipron) in six strengths, 0.8mg to 17.2mg. A needle-free, next-generation option that sets you apart from injection-only competitors.

Saxenda / Liraglutide Pen

Daily liraglutide pen (30mg/5ml, 60mg/5ml). A gentle, well-established entry point for cautious first-time GLP-1 patients.

Metformin ER (PM Formulation)

First-line metabolic medication, PM formulation, 30 tablets. Pairs with GLP-1 therapy for blood-sugar control and GI tolerability.

Ondansetron

4mg, 10 tablets. Anti-nausea support so patients tolerate GLP-1 starts and dose increases instead of dropping out.

Mounjaro (Tirzepatide Pen)

Dual GIP/GLP-1 tirzepatide pen, 2.5mg to 15mg. The premium choice for patients who plateau on semaglutide.

Ozempic (Semaglutide Pen)

Semaglutide pen in 0.25mg, 1mg and 2mg. The most recognized GLP-1 brand, which shortens patient education.

Wegovy (Semaglutide Pen)

Weight-loss-labeled semaglutide, five strengths from 0.25mg to 2.4mg, with a full titration path to maintenance.

Wegovy Tablets (Oral Semaglutide)

Oral semaglutide in 1.5, 4, 9 and 25mg tiers. Proven GLP-1 efficacy for injection-hesitant patients.

Zepbound (Tirzepatide Autoinjector)

Weight-loss-labeled tirzepatide autoinjector, 2.5mg to 15mg. The strongest agent in an easy-to-use format.

HORMONES & SEXUAL

Sexual Health

Men's sexual health is one of the most search-heavy, embarrassment-driven categories in telehealth — patients who would never bring it up in a routine physical will actively look for a discreet, judgment-free way to get evaluated. Divinni's marketing captures that search intent and routes it to network physicians, giving you a program built almost entirely around a demand that already exists and just needs a comfortable point of entry.

High Discretion Demand	Recurring Visit Pattern	Zero Cost to Join
patients specifically seek privacy	ongoing refills, not one-time care	no membership or listing fee

Tadalafil (Generic Cialis)

5mg and 20mg tablets. Long-acting PDE5 inhibitor, up to 36 hours of effect, for daily low-dose or on-demand use.

Vardenafil (Generic Levitra)

20mg, 30 tablets. A third PDE5 option for patients who respond poorly to sildenafil or tadalafil.

Oxytocin Nasal Spray

100 IU in a 10 ml bottle, now carried as a ready-to-dispense spray. Supports intimacy and desire alongside ED therapy, and most telehealth apps don't carry it.

Trimix T105 (Papaverine + Phentolamine + PGE)

Compounded injectable (30 mg / 1 mg / 10 mcg per ml, 2.5 ml vial) for ED patients who don't respond to oral agents. A combination you won't find on most clinic formularies.

Sertraline
50mg, 30 tablets. Used off-label for premature ejaculation, adding a second clinical angle beyond ED.

Sildenafil + Papaverine Troches
Compounded 150mg/25mg troches, 8 per supply. A stronger option for patients who don't fully respond to tablets.

Sildenafil + Tadalafil + Oxytocin
Triple-mechanism strips (40mg/10mg/50 IU) or dissolving tablets (50mg/20mg/125 IU) when single agents fall short.

Libidolex Cream
Compounded topical (1%/6%/5%), 15g tube. A non-oral option used at the point of need.

Sildenafil (Generic Viagra)
50mg and 100mg tablets. The original, most recognized ED medication and the natural starting point.

Tadalafil Liquid Suspension
5mg/ml and 10mg/ml. Flexible micro-dosing for patients who struggle with tablets.

Tadalafil + Sildenafil Troches
Compounded dual-PDE5 troches (12mg/60mg, 22mg/110mg), 8 per supply, for a stronger combined effect.

Tadalafil Troches (Sublingual)
22mg sublingual troches, 8 per order. Faster absorption than a swallowed tablet.

Tadalafil Strips
22mg fast-dissolving strips, 8 per order. Discreet and water-free; completes the tablet, troche and strip lineup.

HORMONES & SEXUAL

Hormone Replacement Therapy

Hormone imbalance — in both men and women — is a category where patients frequently already know something is wrong and struggle to find a physician willing to treat it aggressively with compounded, individualized dosing rather than a one-size-fits-all approach. This program lets you offer exactly that personalization, backed by an accredited 503A compounding network built for it.

Highly Individualized
compounded dosing, not one-size-fits-all

Long-Term Relationship
ongoing monitoring drives repeat visits

Zero Cost to Join
no membership or listing fee

Anastrozole
0.25mg, 0.5mg and 1mg. Manages estrogen conversion, the essential supporting medication in a full hormone protocol.

Tamoxifen
20mg, 30 tablets. A hormone-modulation agent for HRT and fertility-adjacent protocols.

Clomid Brand (Clomiphene)
50mg, 10 tablets. Brand-name clomiphene that stimulates natural hormone production, ideal for younger men concerned about fertility.

Gonadorelin
50mcg, 100mcg and 500 IU troches. Maintains the body's own hormone signaling during therapy.

Enclomiphene
12.5mg and 25mg capsules. A fertility-preserving way to raise natural hormone levels instead of replacing them.

Biest 50/50 + Progesterone Cream
Biestrogen 0.1% / progesterone 4% compounded cream. The anchor therapy for perimenopausal and menopausal patients.

Progesterone Capsule
100mg, 150mg and 200mg. A familiar oral format and one of the most commonly refilled HRT products.

Progesterone Suppository
100mg and 200mg. An alternative route for patients who don't tolerate oral progesterone.

DHEA / Pregnenolone Capsules
Compounded capsules (10mg/25mg, 50mg/25mg). Hormone precursors that support overall balance.

Estradiol Vaginal Cream
2.5mg/ml in 15ml and 30ml. Targeted menopause relief with limited systemic absorption.

WELLNESS & BEAUTY

Wellness & Longevity

Preventive and longevity-focused care is the fastest-growing consumer health category outside of weight loss, driven by patients who feel fine on paper but want to optimize energy, recovery, and long-term health markers. These patients tend to be highly engaged, price-insensitive relative to other programs, and open to ongoing, recurring visits — a strong complement to more acute programs like weight loss or sexual health.

Fastest-Growing Category
outside of GLP-1 weight loss

Highly Engaged Patients
proactive, not symptom-driven

Zero Cost to Join
no membership or listing fee

Cyanocobalamin B12 Injection
1000mcg/ml, 10ml vial. The easiest entry point into Wellness & Longevity for energy and fatigue support.

Methylcobalamin
5mg/ml in 10ml and 30ml vials. Active, more bioavailable B12 for energy and nerve support.

Sermorelin Liquid
0.9mg/ml vial. A growth-hormone-releasing peptide for recovery, sleep and body composition.

Lipo + Pyridoxine (B6) Injection
Lipotropic blend with pyridoxine (B6) 2 mg, methionine, inositol and choline. Supports metabolism and is a natural add-on for weight-loss patients.

NAD+ Liquid
100mg/ml, 10ml vial. One of the highest-demand longevity compounds for cellular energy and recovery.

Niagen
100mg/ml, 5ml vial. A premium NAD+ precursor and the top-tier longevity option in the program.

Biotin Injection
0.5mg/ml and 10mg/ml. Hair, skin and nail support, and a natural cross-sell for Hair Loss and Skin Care patients.

Lipo-Mino-Mix-C Injection
Eight-ingredient single-vial blend: B6, B12, B1, B2, methionine, inositol, choline and carnitine. Metabolic and recovery support in one injection.

L-Arginine Injection
200mg/ml, 30ml vial. Supports blood flow and recovery for performance-focused patients.

L-Lysine Injection
100mg/ml, 30ml vial. An essential amino acid for recovery and general wellness.

Amino Blend Injection
30ml vial combining proline, arginine, lysine and glycine in one all-in-one injection.

Lipo+ Injection
Single-vial core lipotropic injection, often the first product for a new Wellness patient.

Vitamin D3 Capsules
50,000 IU, 30 capsules. Corrects one of the most common deficiencies seen across every program.

Vitamin D3 Injection
50,000 IU/ml in a 30 ml vial. An injectable option for patients who absorb oral vitamin D poorly or prefer fewer pills.

Vita-Complex (B12 / B6 / B1 / B3)
Methylcobalamin B12, pyridoxine B6, thiamine B1 and nicotinamide B3 in one 30 ml vial. A single injection to support energy, nerve health and metabolism.

Zinc Sulfate Injection
10 mg/ml in a 10 ml vial. Supports immune function, wound healing and hormone balance in patients with low zinc.

Tri Immune Boost

Glutathione, zinc sulfate and vitamin C in one intramuscular injection. A monthly immune and recovery add-on that suits cold-and-flu season and run-down patients.

WELLNESS & BEAUTY

Hair Loss

Hair loss is a category where patients often wait years before finally seeking treatment out of embarrassment, then move quickly and decisively once they do — making it a high-conversion program once a patient reaches your virtual door. It's also a naturally recurring visit type, since ongoing hair-loss therapy requires periodic reassessment and refills, giving your practice dependable repeat volume.

High-Conversion Category
patients act quickly once engaged

Recurring by Nature
ongoing therapy drives repeat visits

Zero Cost to Join
no membership or listing fee

Finasteride

1mg and 5mg tablets, 30 per supply. The standard first-line oral treatment for male pattern hair loss.

Minoxidil (Oral Tablet)

2.5mg, 30 tablets. Easier to stay consistent with than daily foam or liquid, which improves adherence.

Dutasteride

0.5mg, 30 capsules. A stronger step-up for patients who don't respond to finasteride.

Advanced Hair Regrowth Solution

Compounded 60ml topical in two formula variants. A higher-concentration option beyond standard minoxidil.

Hair Regrowth Solution

30ml, four active ingredients. A mid-tier step between standard minoxidil and the advanced solution.

Minoxidil / Finasteride / Tretinoin Spray

30ml compounded spray combining three actives in one daily application.

WELLNESS & BEAUTY

Skin Care

Dermatology-guided skin care is chronically hard to access through traditional channels — wait times for a dermatologist appointment routinely stretch months in many markets — which pushes motivated patients toward telehealth alternatives. Offering this program lets your practice capture that overflow demand with a straightforward virtual visit and compounded, prescription-strength formulations most patients can't get over the counter.

Access Gap
long dermatology wait times drive demand

Prescription-Strength
beyond what's available over the counter

Zero Cost to Join
no membership or listing fee

Clindamycin Gel

1%, 30g tube. Prescription topical antibiotic, often the first product in a new acne visit.

Epiduo Forte Gel

0.3%/2.5%, 45g tube. Branded two-ingredient gel for acne that hasn't responded to single agents.

Clobetasol Cream

0.05%, 30g tube. High-potency topical steroid for stubborn inflammatory conditions.

Sulfacetamide Lotion

10%, 118ml bottle. Prescription option for acne and rosacea-related concerns over larger areas.

Desonide Cream

0.05%, 60g tube. Lower-potency steroid for sensitive areas and milder inflammation.

Doxycycline Capsules

100mg, 30 capsules. A systemic escalation for moderate-to-severe acne.

Minocycline Capsule

100mg, 30 capsules. A second oral antibiotic if doxycycline isn't tolerated or effective.

Spironolactone Tab

100mg, 30 tablets. Off-label option for hormonal acne, especially in female patients.

Skin Rejuvenation Formula

Compounded multi-ingredient 30g tube targeting skin texture and overall appearance.

NAD+ Pump Face Cream

10%, 30ml pump. Brings NAD+ into an anti-aging skin-care product and cross-sells with Wellness.

NAD+ Cream 10% (100 mg/g)

10% (100 mg/g) tube cream. A topical NAD+ option for skin-renewal patients who prefer a cream, and a natural pairing with the NAD+ injectables.

NAD+ Pump Nasal Spray

150mg/ml, 30ml spray. Needle-free NAD+ delivery for patients who skip injections and creams.

Benzocaine / Lidocaine / Tetracaine Cream

20%/10%/10%, 30g tube. Triple-anesthetic numbing cream for procedural comfort.

Tretinoin Cream

0.025%, 0.05% and 0.1% in two tube sizes. The gold-standard retinoid and a long-term anchor product.

Melatonin Cream

2.5%, 30g and 60g. An evening skin-repair product that pairs with tretinoin.

Hydroquinone / Tretinoin / Fluocinolone Cream

4%/0.05%/0.01%, 30g and 50g. Established treatment for hyperpigmentation and melasma.

METABOLIC CARE

Labs & Kits

Every program in this booklet works better with real data behind it, and this is the program that supplies it. Divinni's at-home lab kit turns a routine blood draw into something a patient can do from their kitchen table, removing the single biggest friction point — a trip to a draw site — between a patient and the panel your treatment decisions depend on.

30+ Analytes
one activation step, single kit

400–600µL Sample
less than 1 out of 10 on pain score

Ships Direct to Patient
no lab visit required

Divinni At-Home Blood Collection Kit

FDA 510(k)-cleared at-home blood draw: 30+ analytes across nine categories, return shipping included both ways. A natural companion to HRT and Weight Loss.

Epinephrine Auto-Injector 0.3 mg

0.3 mg auto-injector for severe allergic reactions. A clinical-readiness item for practices that administer injectables, and a prescription for patients with known allergies.
